**Dear His Excellency the Cultural Attaché,
Embassy of Belarus in Cairo**

It is our pleasure to inform you about our recent scientific initiative. You may wish to invite interested scientists and institutions from your country to take part actively (as speakers) in the international conference on **"Basic and Applied Photochemistry, Materials and Nanomaterials for Energy, Water and Pharmaceuticals", [Nano-Solar'2020]. Luxor, Egypt; 16 – 19 December 2020**

We are looking forward to hearing from you and welcoming you in Luxor, the most peaceful and cultural place in Egypt! We rely on your support.

This edition* of the well-known interdisciplinary conference that started in 1991 will cover a wide spectrum of the most recent and hottest topics in advanced photochemistry, photobiology, and photophysics (excited-state dynamics and modeling), photocatalysis. Moreover, sessions on: -Nanosensors, Nanoscale Building Blocks for Novel Materials, Photonics.

- 3G solar cells. - Nanoscience, renewable & environmental photochemistry. - Nanofluids and solar thermal technologies as well as 3D printing.

- Theoretical modeling (electronic structure and spectroscopy).

- Photostability of drugs, advances in sunscreen/anti-aging formulations, cosmetics and nanomaterials in Pharmacy and Medicine.

We appreciate your nomination or recommendation of a number of Eminent Scientists from your country to deliver plenary, keynote and invited lectures at the conference.

This Nano-Solar conference will also provide a forum for in-depth assessment of the challenges involved in the dynamic and fast-moving fields of photochemistry and solar chemistry.

It would be greatly appreciated if you kindly disseminate the announcement among the scientific members of your country scientific.

Conference venue will be (tentatively) at Steigenberger Nile Palace Hotel Luxor.

Once again, we are looking forward to hearing from you and welcoming you and active participants from your country to strengthen the mutual collaboration. We rely on your support.

Prof. Dr. Sabry Abdel-Mottaleb, Conference Chairman
